

npm v0.3.0

CI passing

license package not found

A React PDF viewer built for RAG (Retrieval-Augmented Generation). Originally developed as part of [HyperCard.AI](#)'s chatbot platform, hyper-jump provides fast page navigation that pairs with RAG citations to deliver an excellent document viewing experience.

Features

- Virtualized rendering via `react-window` for smooth viewing of large PDFs
- Jump-to-page navigation for instant access to cited content
- Zoom controls with preset levels and automatic fit-to-width
- Responsive layout that adapts to container size
- Lightweight, self-contained CSS with no external styling dependencies

Installation

```
npm install @hypercard-ai/hyper-jump react-pdf
```

Usage

```
import { HyperJumpViewer } from "@hypercard-ai/hyper-jump";

import "@hypercard-ai/hyper-jump/styles.css";

function App() {

  return <HyperJumpViewer url="/path/to/document.pdf" />;

}
```

Open a PDF at a specific page

Pass a zero-indexed `initialPage` to start at a specific page when the document loads:

```
<HyperJumpViewer url="/path/to/document.pdf" initialPage={3} />
```

Jump to a page imperatively

Use a ref to jump to any page at any time — ideal for navigating to RAG citations:

```
import { useRef } from "react";

import { HyperJumpViewer, type HyperJumpViewerAPI } from "@hypercard-ai/hyper-jump";

import "@hypercard-ai/hyper-jump/styles.css";

function App() {

  const viewerRef = useRef<HyperJumpViewerAPI>(null);

  return (

    <>

      <button onClick={() => viewerRef.current?.jumpToPage(5)}>

        Go to page 6

      </button>

      <HyperJumpViewer url="/path/to/document.pdf" ref={viewerRef} />

    </>

  );

}
```

API

<HyperJumpViewer />

Prop	Type	Required	Description
url	string	Yes	URL or path to the PDF file
initialPage	number	No	Zero-indexed page to show when the document loads
onPageChange	(page: number) => void	No	Called when the visible page changes (zero-indexed)
ref	Ref<HyperJumpViewerAPI>	No	Ref exposing imperative jumpToPage method

HyperJumpViewerAPI

Method	Description
jumpToPage(page: number)	Scroll to a zero-indexed page. Clamps to valid range.

Exports

Export	Type	Description
HyperJumpViewer	Component	The PDF viewer component
HyperJumpViewerAPI	Type	Imperative API exposed via ref
HyperJumpViewerProps	Type	Props for the viewer component
ZoomConfig	Type	Zoom configuration interface

Requirements

- React 19+
- react-pdf 10+

Development

```
npm install
```

```
npm run storybook    # Start Storybook on port 6006
```

```
npm run test         # Run tests
```

```
npm run check        # Format and lint with Biome
```

```
npm run build        # Build the package
```
